San Francisco, January 4th.—About 10 o'clock this morning the residents in the Baldwin Hotel were startled by a pistol shot in one of the upper corridors, and scon the report spread that E. J. Baldwin had been shot. Special officer Morris Baker, who was passing, was called in, and found Verona Baldwin in one of the hallways, holding a smoking pistol in her right hand. On the approach of the officer she warned him to keep off, or else she would shoot him. After engsgir g in conversation with her for a short time Baker made a spring and grasped her, at the same time taking the pistol from her hand. This morning she approached him again, and, on his refusal, pulled a pistol from her pocket and fired at him. After the first shot the hammer caught and refused to work, which probably saved "Lucky's" life, as the woman evidently intended to kill him.

Upon being conveyed to the City Prison, Miss Baldwin was placed in one of the new cells, and a charge of assault to murder was booked against her. She says that she is a cousin of Baldwin, and claims to have made his acquaintance about three years ago, and that, after repeated attempts, he succeeded in ruining her. Judge Stetham s a Creek, and for many years has been one of the important factors in all In-dian matters. He is well known in Washington, having for several years been a Delegate in Congress from the Territory. This form of government existed until the close of the late war, in which they were divided, North and South. When they reunited and returned home, Sands, the acting chief of that portion of the Creeks who supported the United States Government proposed that we do away with the two chiefs and unite under one head. This was agreed

An engagement ensued, in which seven of Checote's men were killed. It is not known whether any of the other party wers killed, as they held the field. "ODDS AND ENDS."

For a long time—espe-

cially during the rush of the latter part of the Fall Trade—there has been an accumulation of irregular lines of goods and broken quantities of various things in all Departments. It is so every year at this time.

These "ODDS AND ENDS," although in themselves none the less desirable for the needs and purposes of those who buy them, are a hindrance to a regular and orderly stock of goods. Thus, to rid ourselves of them, and to carry out our determination to commence the year with a perfectly clean stock, we have TO-DAY placed all these goods on Counters by themselves and marked them. Some at a little above half value, some at just half value, and others

A number of job lots of goods bought last week will also be disposed of at this sale.

Swift Specific Co., Atlanta, Ga.:

I have delayed thus long in writing because I wanted to make "assurance doubly sure" in the trial of S. S. S. in my own case, and am most happy to report that it has entirely eradicated every symptom of the disease from my system. Had I followed the aivice of Tom Swift in years gone by, it would have saved me ten years of intense suffering. I have not felt the least return of the disease, and can fully and truly recommend S. S. S. to all suffering from the scourge, and especially to the physicians in ommend S. There are many at the age of thirty to sixty who are troubled with too frequent evacuation of the bladder, often accompanied by a slight smarting ourning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin mikish bue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.
